2019 Program Review

MJC Program Review 2019

Modesto Junior College's Program Review process is divided into 3 sections:

- Program Analysis (SWOT Analysis)
- Goal Setting and Activities
- Resource Request

Program Analysis

Internal Strengths

1. What strengths does the analysis of student data reveal?

We are serving our Hispanic community with that being the highest percentage of participants. Hispanics are also the highest percentage of completion of the program. The number of transfer students have nearly doubled since the inception of the program and the 81% retention rate is high.

2. Are there specific aspects of the program that are exemplary or could serve as a model?

The high number of Hispanic participants is exemplary.

3. What do others see as the program's strengths?

According to the students they joined the program because of the transfer opportunities as well as the high-quality athletic training program offered.

4. How well are students meeting program learning outcomes, skills, or competencies; and how are they relevant to careers in your discipline or industries for which you help prepare students?

They are meeting the outcomes. Their acceptance to and completion of the program at four-year institutions is a good indicator of the success of the program.

Internal Weaknesses

5. What gaps are observed by reviewing the student data?

None

6. What disproportionate gaps need to be addressed?

None

7. What are areas in which the program could improve? (curriculum, scheduling, modality, other?)

As the program continues to grow our lack of a bigger athletic training center will inhibit its growth. In addition, if it continues to grow our lack of a second full time athletic trainer or other full time staff will hinder the students class selection for the advanced courses. We might also need classified positions as well.

8. Where are there gaps in the program on how students are meeting learning outcomes, skills, or competencies?

No gaps are shown according to the data.

External Opportunities

9. Where are potential opportunities for expansion, improvement, or new program development?

As the program grows, more faculty need to be added for expansion of section offerings.

10. What are some industry or disciplinary trends that could enhance the program?

Local personal training, physical therapy, and athletic training internships could be offered by partnering with local businesses. Using local high schools for athletic training internships specifically are highly desired. Offering state or national industry certifications could add more opportunities for students to be employed while pursuing their BA/BS or Masters Degrees.

External Threats

11. How are changing resources, technology, employer, or transfer requirements affecting the program's ability to serve students?

Changing technology adds costs that must be budgeted to remain current and to keep up with industry standards.

12. What are some current industry or disciplinary trends that could have a negative impact on the program?

The state certifications could be challenging to keep up with if we are not able to offer them on site. They are also an additional cost for the students if we cannot offer as part of our coursework.

13. What other obstacles does the program face?

We must also have state of the art equipment available for teaching and learning.

Goal Setting and Activities

Goals

Program Goal	Mission Alignment	Area of Focus
1. Local internships for students in personal training, physical therapy and athletic training.	Workforce Needs	Internship/Service Learning
2. Be up to date with technological advances for hands-on teaching and learning.	Innovative Education	Student Support
3. New athletic training and fitness facilities for student and teacher use.	Innovative Education	Program Design

Activities

Activities	In Support of Goal #	Outcome or Deliverable
Develop Partnerships with local Physical Therapists, Fitness Clubs, and High Schools.	Goal #1	Deliverable
New, larger fitness and athletic training center.	Goal #3	Deliverable
More course offerings.	Goal #2	Outcome
Improve Technology	Goal #2	Outcome

Resource Requests

Category	Request	Activity #	Estimated Cost
Equipment	Fitness Equipment (machines, free weights, etc.)	2	100000
Technology	Laptops, fitness measurement monitors	4	25000
Personnel	1 Certificated Full Time Faculty	6	75000
Personnel	Two Classified Full Time Positions	2	100000
Facilities	Fitness and Athletic Training Facility	2	2000000
